Hardie® Plank fibre cement cladding combines quality and beauty in one product. Its range of 21 colours in either cedar or smooth makes it the perfect design choice for any building.

It's low maintenance thanks to the ColorPlus™ technology, which allows you to enjoy the rustic look of wood without regular maintenance. Additionally, it is fire-resistant, extremely durable and comes with a 15-year manufacturer's warranty.

Hardie® Plank is versatile and quick and easy to install, and can be installed in several ways, including horizontal, vertical, lapped or open-jointed, giving you even more design flexibility.

- Most natural look
- Fire-resistant A2 rating
- 21 colours - 2 textures

- Fast and easy to install
- Low maintenance
- 15-year manufacturer's warranty

Hardie® VL Plank - James Hardie

Hardie® VL Plank is a fibre cement interlocking cladding system that offers quality, versatility, and faster installation. You can choose from eight modern colours with a cedar texture to create a beautiful finish.

The interlocking clip-less system enables up to 20% faster installation as each plank seamlessly interlocks with the other to create a stunning, clean look. Hardie® VL Plank is low maintenance thanks to its ColorPlus™ technology, which allows you to enjoy the rustic look of wood without regular upkeep. It is fire-resistant, extremely durable, and comes with a 15-year manufacturer's warranty.

- Most natural look
- Fire-resistant A2 rating

Hardie® Panel
Design flexibility that's affordable

Introducing the **Hardie® Panel** Range – the ideal choice for your next project is an affordable, high-performance A2 fire-rated panel cladding system. Made from high-quality fibre cement, you can trust that you'll get the strength and durability you need, making it a cost-effective solution for any construction project.

- Low-maintenance
- Easy to install

- Non-combustible
- Can withstand high winds and hail

- 15-year manufacturer's warranty

Hardie® Panel is available in a choice of textures and a range of stylish colours allowing you to create a wide range of designs.

Hardie® Panel - Smooth texture

Hardie® Architectural - Two textures of Smooth Sand and Brushed Concrete

Hardie Panel

Hardie® Panel — 3048mm x 1220mm x 8mm

Available in a smooth texture and a variety of core colours, or can be ordered in a custom RAL reference for a bespoke look.

Length: 3000mm
Available in the entire colour range from James Hardie.

Hardie™ Panel Standing Seam End Trim.
Length: 3000mm
Available in the entire colour range from James Hardie

Tudor Board :- Infuse a classic touch into your project by creating an elegant Tudor board effect. Achieve this timeless aesthetic with the incorporation of Hardie's NT3 trim, designed to seamlessly enhance the beauty of your design.

HardieTrim™ NT3™
Options:
90 x 3655 x 25mm
140 x 3655 x 25mm
Colours: Arctic White, Midnight Black and Sail Cloth

Durasid Cladding

Durasid Original is a low-maintenance and high-quality cladding solution for exterior walls. Its range has three styles with a natural embossed wood grain finish in 8 modern colours.

Durasid cladding is made from durable PVC-U and has a co-extruded top layer to keep the colour looking great for years. It's easy to maintain, extremely impact-resistant and easy to install.

Durasid Original Styles:
- **Single Siding 167mm:** Offers an overlapping finish.
- **Vertical Siding 167mm:** Can be installed vertically or horizontally for a v groove finish.
- **Double Siding 333mm:** For faster installation and creates a shiplap finish.

Durasid Cladding

Durasid Foresta is an external wall cladding with a wood design on each board. The unique process of digital printing is applied to the rigid foam panels resulting in a realistic, natural wood finish. Available in a choice of 8 colours in 5m lengths.

Please note, the aluminium trims are a solid colour and not a printed design.

Kayflow offers a range of soil and underground systems providing a comprehensive solution for managing drainage and wastewater in residential and commercial settings.

Includes:

110mm Soil System
110mm and 160mm Underground Systems
320mm and 450mm Inspection Chambers

110mm Soil System

You can count on a robust, complete solution when using Kayflow's soil system.

- Comprehensive range of profiles and fittings in black, grey and white
- High gloss uPVC for low maintenance
- Lightweight, durable and easy to install
- Compatible with most other UK systems
- Tested to BS EN 1329-1: 2014

ClassicBond® EPDM Contractor Training

ClassicBond EPDM Training: Unleash Your Roofing Potential!

Elevate your skills and expertise through this comprehensive one day manufacturer's course, allowing you to become certified in installing ClassicBond EPDM and offer your customers an up to 20-Year Membrane warranty.

Why Attend?

- Technical details on how the system works.
- Information on the specific products needed and how to use them.
- Over 6 hours of hands-on training, working with the products and getting support from experienced ClassicBond technicians on how to correctly install an EPDM roof including:
  - The main flat roof area, detailing work, corners, abutments, roof protrusions and rainwater outlet
  - Detailing in and around roof lights
  - Detailing roof trim systems

Register your interest in branch to find out about our next training day.

GRP ROOF 1010

GRP Roof 1010 is the ultimate flat roof system, developed by RESTEC's leading chemists, providing seamless and long-lasting waterproofing protection for flat roofs. Made with high-quality fibreglass, making it one of the most durable roofing options available to date.

Its versatile design means it can be easily installed across a variety of roof styles, including flat and pitched roofs.

The easy to install system is **LABC approved** for compliance with building regulations, **fully fire tested** and supported by a manufacturer's **20-year** materials guarantee (registration with manufacturer required).

FlexiTec 2020

Flexitec 2020 is a revolutionary, single-resin GRP system that's been transforming the liquid roofing industry. This cutting-edge, single resin system has quickly become the go-to choice for roofing professionals thanks to its full overlay and new deck capabilities. No other flat roof system is as highly versatile as it can coat many different surfaces to create a seamless, tough and flexible membrane for any roof or balcony.

Its rapid installation process offers a cure time of 30-60 minutes per coat, and it can achieve **BROOF(t4) Fire Rating.** It's also **LABC Registered detail** for assured compliance with building regulations. A **manufacturer's 20-year materials guarantee** is accessible to **trained installers** (Roof installation registration with manufacturer required)**.**

Acryltex 475

ACRYLTEX 475 is an instant waterproofing repair solution. An advanced acrylic that contains fibres for extra strength and durability. Its advanced formula instantly waterproofs in one coat. No mixing required. Ideal for roofs, gutters, and more.

- Waterproofs instantly
- Only one coat needed for fast repairs
- Ready to use straight out of the tin
- Rainfall after application has no adverse effect
- Contains fibres that provide extra strength for the coating and interlace to cover small gaps
- Ideal for maintenance work

Resgrip

Resgrip is a one coat anti-slip system designed to provide durable and vibrant slip resistant finishes. Resgrip is a hybrid MMA coating that excels in a wide range of trafficked applications. With its pre-dispersed anti-slip aggregate, applying Resgrip is easy and fast and ensures a seamless and even result.

Resgrip can be applied to a wide range of substrates to create an anti-slip finish, these include:

- RESTEC Waterproof Systems
- Concrete
- Asphalt (traffic and roofing grades)
- Metals
- Liquid Applied waterproofing systems

Guardian Slates

Guardian Slates are an innovative roofing system that provides the aesthetic appeal of natural slate without the risk of cracking and breaking.

Manufactured from resin-bonded crushed limestone, making them extremely durable, impact and heat-resistant and offer the highest level of UV protection. A great choice for those looking for a practical, long-lasting, and attractive roofing solution.

- High-quality
- Up to 60% lighter than traditional slate
- Quick and easy to install
- Fire Rated
- Superior life expectancy
- Ideal for new or replacement roofs

PROFILE22   stellar   ALUMINIUM SYSTEMS   stratus thermal lantern roof   FAKRO®   GRANADA secondary glazing

Optima Fully Sculptured Windows

Optima by Profile 22 is a complete 70mm sculptured system that provides excellent performance in various applications, including casement, French casement, and tilt & turn windows. It offers better insulation and weather protection, a larger glass area, and revolutionary centre seals to the outer frame and sash. The system provides design flexibility with the broadest range of ancillaries and double and triple-glazed options, including cost-effective triple glazing that achieves U-values below 1 without using krypton gas. Optima also features deeper drainage channels, maximum security and strength, and easy installation. It meets Building Regulations and PAS 24:2022, making it superior quality and a durable choice.

Superb weather protection	Better Insulated	Better Drainage	Superior Security & Strength

Casement Windows

The Optima Casement Window is a classic window design suitable for almost any aperture or design layout, including bay and bow windows. It has single top or side hung openers and multi-lights.

- Sculptured edge design
- 28 & 36mm glazing options
- 5-chamber sash (with optional RCM inserts available)
- Outer frame / sash centre seals
- 10mm cover on weather seals
- 6-chamber outer frame (with optional RCM inserts)

These features are carefully designed to provide outstanding aesthetics, exceptional security, and impressive thermal efficiency.

French Casement Windows

The Optima French Casement Window is ideal for dormers, cottages, and smaller apertures. Its symmetrical opening panes offer good ventilation, unrestricted views, and the possibility of an emergency-escape route, with an impressive glass-to-frame ratio due to slim and unobtrusive profiles.

- Sculptured edge design
- 28 & 36mm glazing options
- 5-chamber sash (with optional RCM inserts available)
- Outer frame / sash centre seals
- 10mm cover on weather seals
- 6-chamber outer frame (with optional RCM inserts)

These features are carefully designed to provide outstanding aesthetics, exceptional security, and impressive thermal efficiency.

Tilt & Turn Windows

Ideal for high, exposed, or challenging locations, the Optima Tilt & Turn Window offers superior sightlines and secure all-round locking, perfect for commercial and residential projects. Its sleek frame design ensures both reliability and elegance.

- Sculptured edge design
- 28 & 36mm glazing options

Optima Flush Casement

The Optima Flush Casement Window is the perfect union of timeless charm and modern efficiency. Crafted to embody an authentic period aesthetic with great features, mechanical jointing, a balanced dummy sash, a deep bottom rail mirroring original timber frames, and heritage-inspired hardware like monkey-tail handles and dummy peg stays.

Beneath its classic exterior, the Optima Flush Casement Window unveils a groundbreaking design, making it the most energy-efficient flush casement window on the market. Experience a warmer, draught-free home while enjoying top-tier security that exceeds legal requirements.

| Low u-values | Water tightness to 600Pa | Wind load resistance to 2000Pa | Safe and Secure |

Casement Windows

The Optima Casement Window is a classic window design suitable for almost any aperture or design layout, including bay and bow windows. It has single top or side hung openers and multi-lights.

- Flush edge design
- 24mm glazing options
- 70mm System
- Multi point locking

These features are carefully designed to provide outstanding aesthetics, exceptional security, and impressive thermal efficiency.

Industry-leading technology for superior performance

Elevate Home Security:
Yale SensCheck

SensCheck compatible windows and doors available on request.

About SensCheck™

SensCheck™ is compatible with popular smart home platforms like Amazon Alexa, Google Assistant, and Philips Hue, allowing you to control your sensors with just your voice. Give your customers the power to check and control their home security remotely with the 'Yale Alarm' App.
With SensCheck™, they can:

Check if their doors are open, closed, locked or unlocked. Check if their windows are open, locked in vented position or locked in the closed position.

Receive a chime notification when a window or door changes status.

Arm or partially arm their home for customised security.

Alarm will sound (using 94dB SyncHub) if sensor status changes when alarm is armed

Geo-fencing alerts mean they'll receive notifications on the Yale Smart Living Alarm app if they have forgotten to secure their property

Please request windows and PVC doors to be Yale SensCheck ready.
Note that the sensor is not supplied by EWE Building Plastics and will need to be sourced elsewhere.
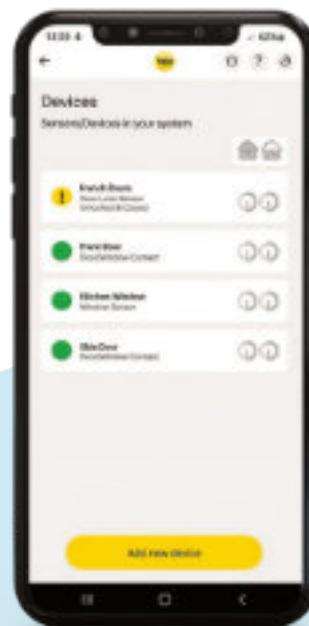

Vertical Sliders

Introducing Evolve VS Vertical Sliding Sash Windows. Crafted to preserve the graceful proportions of traditional sash windows, Evolve VS seamlessly combines classic charm with modern technology.

Enjoy effortless cleaning with tilting upper and lower sashes, sleek design with low-line beads, and gaskets for improved sight lines. Benefit from energy-efficient glass, a 10-year manufacturer's warranty and robust security with aluminium and steel reinforcement.

Transform your home with the perfect blend of classic style and contemporary efficiency.

▸ No dummy sashes needed
▸ Flush sash
▸ All internally beaded as standard

Performance

▸ WER up to Band A with triple glazing
▸ U-values as low as 1.1 W/m^{2}K

U-values dependent on window design

Guarantees

▸ 10 year mechanical performance manufacturers guarantee.
▸ 10 year surface powder coat finish manufacturers guarantee

Fully Flush Casement

The Fully Flush Casement Window defines modern elegance with a streamlined look both inside and out. No angles, no overlaps—just pure, clean shapes and ultra-thin frames set Stellar apart. Carefully selected hardware ensures reliability, durability, and enhanced security while maintaining the remarkable lines of this window. Customise configurations to match your design preferences, enjoying improved light levels, better insulation, and easy maintenance.

For those seeking an aesthetic touch, we also offer Fixed Frame Windows. With proportions that let the view and light take centre stage, these windows add more interest to your space.

Flush Tilt and Turn

The Flush Tilt & Turn Window combines strikingly slim aesthetics with concealed gearing, delivering a beautifully streamlined finish. The design creates a dramatic expanse of glass, maximising light and views for a sophisticated living space that is a joy to inhabit.
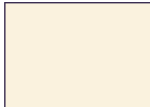

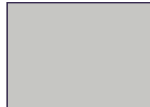

Expect outstanding thermal and weather performance, safeguarding you from the elements. Robust internal hardware, multiple locking points, and intelligent gearing enhance security, providing reassurance. The Flush Tilt & Turn window from Stellar blends elegant simplicity with unparalleled performance.

FAKRO Roof Windows

Add a focal point to any room with a FAKRO roof window.

Their windows are the perfect mix of style and high quality, meaning you can rest assured they will stand the test of time. They feature a universal bracket fit system making them easy to fit with more positioning choice.

FAKRO have been producing innovative quality products for over 20 years. When it comes to roof windows, FAKRO leads the way in quality and design innovation.

Low U Values — Energy-efficient design

High quantities of natural light.

Quick and easy to Install

Anti-burglary protection

10-Year Warranty — 10 Year manufacturer's warranty

topSafe
FAKRO's topSafe system significantly improves resistance to break-in attempts and protects against the sash opening under foot pressure if stepped on.

V40P
FAKRO's V40P automatic air inlet is positioned in the top part of the frame.
An elastic, pneumatic flap deflects, limiting the amount of in-flowing air by reducing the air inlet duct area.

thermoPro
ThermoPro technology increases energy-efficiency performance, provides greater durability, ensures excellent tightness and facilitates the installation process of roof windows.

Internal Finishes

Natural Pine

White Polyurethane

White Acrylic

White UPVC

Centre Pivot

The FAKRO centre-pivot roof window is by far the most popular choice, offering unbeaten quality in many different internal finishes, glazing types and sizes.

- Easy cleaning as the sash rotates 180°
- Handle at the bottom for easy operation
- Wide range of accessories
- Available as Z-Wave (electric) and Solar

Top Hung Dual Action Roof Windows

FAKRO's new generation of top-hung roof windows, seamlessly transitions between top-hung and centre-pivot modes at the press of a button. With two independent opening mechanisms, the outward function allows flexible positioning from 0° to 45°, combining convenience and versatility in one sleek design.

- Easy cleaning as the sash rotates 180°
- Handle at the bottom for easy operation

Conservation

The FAKRO conservation roof window combines top-quality windows with the conservation style that allows roof windows to be installed in listed or heritage buildings.

- Available in a range of profiles
- Middle black vertical mullion bar
- Available in double and triple glazed
- External colour - RAL 9005

High Pivot, Balcony, L - Shaped, Side Hung and more Available

Patiomaster – An exceptional range of high-quality sliding doors

What makes a Patiomaster door?

1. Slim Stepped Frame: Easier installation, protects your decor.

2. Hardware Customisation: Various handle colours.

3. Range Finishes: Wide range of woodgrain, colour, and classic white options.

4. Low Internal Thresholds: Ideal for internal use.*

5. High-Performance Seals: Unobtrusive gaskets and seals for enhanced performance.

6. Glazing Options: Double Glazing (28mm) & Triple Glazing (36mm)

7. Multi-Chambered Sash: Provides strength and thermal efficiency.

8. Yale Six-Point Locking: Exceptional security system.

9. Concealed Fixings: No visible screw heads for a sleek appearance.

10. Midrail Option with Letterplate: Perfect for front entrances.

*Note: Low thresholds recommended for internal use only.

In-line Sliding Doors

Patiomaster offer adaptable design, seamlessly fitting into any property, with options ranging from 1.6 metres for 2-pane styles to a spacious 6-metres aperture for 4-pane models. Additional fixed panes can be added for extra light and match the appearance of larger bi-folding doors.

These streamlined doors are perfect for gardens, porches, or conservatories, opening without requiring extra floor space. For front entrances, a midrail option is available for a letterplate or house number.

Style	Max Width	Max Height	Min Width*	Min Height*
2 pane	3004mm	2360mm	1574mm	1900mm
3 pane (Centre Slider)	4509mm	2360mm	2364mm	1900mm
